HYUNDAI DOES NOT RECOMMEND THE USE OF COUNTERFEIT, GREY MARKET, AFTERMARKET, IMITATION, RECYCLED COLLISION REPAIR PARTS, ALTERNATE OR OTHER NON-ORIGINAL EQUIPMENT PARTS.

Hyundai vehicles, along with Hyundai Genuine Parts, are designed and manufactured to meet Hyundai's exacting engineering specifications and to help protect vehicle occupants in collisions.

Hyundai Genuine Parts, including all elements of Hyundai's occupant restraint system, are installed on Hyundai vehicles when they are tested to ensure they meet the U.S. government's collision safety and crash protection standards. Hyundai Genuine Parts help to ensure occupant protection and vehicle integrity. Use of counterfeit, grey market, aftermarket, imitation, recycled collision parts or any alternative or other non-original equipment parts for the repair of any collision damaged vehicle may negatively affect vehicle crashworthiness and occupant safety during a collision and is not recommended by Hyundai.

Additionally, Hyundai does not recommend the use or re-use of components removed or recycled from an existing collision-damaged vehicle. It may be difficult to tell if recycled parts are non-original equipment parts, or if the parts have been damaged as a result of prior collision or exposure to the elements.

In addition to increasing Brand Protection awareness, Hyundai has increased Brand Protection efforts through an existing partnership with Mobis Parts America in order to safeguard our customers and protect the integrity of Hyundai's parts. A dealer should only sell Hyundai approved original equipment parts in order to protect our customers' safety and the Hyundai brand.
